#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Drawings***

2. The drawings were received on January 10, 2005. These drawings are acceptable.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 13 and 15-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claims 13 and 21, they appear to be claiming three different types of movements, the first one is rotating, the second one is tilting, and the third one is pressing. However, the original disclosure appears to describe only two movements, the first and second ones. Therefore, these claims create conflicting and contradicting key functions which cannot be evaluated in view of the original disclosure, and therefore, no art rejections can be applied. Also, they are considered as a new matter.

***Response to Arguments***

5. Applicant's arguments filed September 22, 2005 have been fully considered but they are not persuasive.

Applicant's arguments with respect to the 112, first paragraph rejection have been considered. A careful reading of the specification in FIGs. 1 and 2 and associated text (pages 5 and 6 of the specification) describe the pressing movement only as an alternative description to the tilting movement. It is not in and of itself a separate movement or function to the tilting. Nowhere in the specification is the separate function of pressing and tilting described. They are only recited as alternative descriptive language in the specification. Therefore, the claims remain rejected since they recite the pressing function as a separate function to the tilting movement. The art rejections have not been applied, therefore, no discussion is made regarding the references themselves. If future amendments correct the above problems and the same references are applied, there will be a full response to the arguments.
